

Sage Line 50 Accounts

Sage Instant	single and 2 users
Sage Instant Plus	single and 2 users
Line 50 Accountant	single and 2 users
Line 50 Accountant Plus	single and 2 users
Line 50 Financial Controller	single, multiple users and multi-company

All Sage products are seamlessly upgradeable from older versions, including DOS. Use an accounts package to simplify a seemingly complicated activity.

Invoices & Credit Notes and receipts & payments are only entered once, reducing data input but giving an amazing amount of behind the scenes information.

You do not have to be an accountant, but you will get much of the information they can produce. You regain control of your business and gain plenty of information to make decisions based on current data, not just accounts from the previous year-end.

- Start using Sage products with confidence immediately.
 - Have your own choice of layout and management reports set up for you.
 - Accountancy jargon is explained in plain English. (Some is unavoidable)
 - Methods are set up to guide you through the accounting processes.
 - Have time to make your own notes, so you understand and remember what has to be done and how to do it.
 - Learn with your own data in your own time on your premises and on your own computer.
 - Be amazed just how much useful information is readily available.
 - Please the bank manager by giving him the management accounts he is always asking for - without the need of your accountant.
 - Run your VAT return as often as you like, it takes moments.
 - Run a Profit and Loss or Balance Sheet ñ just because you can ñ whenever you want that information.
 - Learn to use the powerful features you choose.
 - Export data (Not Sage Instant) to Excel or Access to manipulate data further.
 - Use other Sage products to integrate various parts of your business ñ seamlessly.
- Have special reports designed to your particular requirements.
